Contents Vol. 132

Integrated Ediacaran chronostratigraphy, Wernecke Mountains, northwestern Canada
L.J. Pyle, G.M. Narbonne, N.P. James, R.W. Dalrymple and A.J. Kaufman 1

Facies architecture and sequence development in a Neoproterozoic carbonate ramp: Lakheri Limestone Member, Vindhyan Supergroup, Central India
P.P. Chakraborty 29

Paleomagnetism and $^{40}Ar/^{39}Ar$ ages of mafic dikes from Salvador (Brazil): new constraints on the São Francisco craton APW path between 1080 and 1010 Ma
M.S. D'Agrella-Filho, I.I.G. Pacca, R.I.F. Trindade, W. Teixeira, M.I.B. Raposo and T.C. Onstott 55

U–Pb zircon geochronology and petrology of granitoids from Mitwaba (Katanga, Congo): implications for the evolution of the Mesoproterozoic Kibaran belt
J. Kokonyangi, R. Armstrong, A.B. Kampunzu, M. Yoshida and T. Okudaira 79

Pb–Pb age of earliest megascopic, eukaryotic alga bearing Rohtas Formation, Vindhyan Supergroup, India: implications for Precambrian atmospheric oxygen evolution
S. Sarangi, K. Gopalan and S. Kumar 107

Pb–Pb ages of Neoproterozoic Doushantuo phosphorites in South China: constraints on early metazoan evolution and glaciation events
D.F. Chen, W.Q. Dong, B.Q. Zhu and X.P. Chen 123

SHRIMP U–Pb and Sm–Nd ages of the Niquelândia layered complex: Meso- (1.25 Ga) and Neoproterozoic (0.79 Ga) extensional events in central Brazil
M.M. Pimentel, C.F.F. Filho and R.A. Armstrong 133

Source and tectono-metamorphic evolution of mafic and pelitic metasedimentary rocks from the central Quetico metasedimentary belt, Archean Superior Province of Canada
F. Valli, S. Guillot and K.H. Hattori 155

Characteristics and geochemistry of Precambrian ophiolites and related volcanics from the Istanbul–Zonguldak Unit, Northwestern Anatolia, Turkey: following the missing chain of the Precambrian South European suture zone to the east
E. Yiğitbaş, R. Kerrich, Y. Yılmaz, A. Elmas and Q. Xie 179

Special Issue
Insights on Archean Continent—Ocean Assembly, Western Superior Province: From New Structural, Geochemical and Geochronological Observations

Organised by:

John A. Percival
Geological Survey of Canada, Ottawa, Canada

Sponsors
Western Superior NATMAP, Western Superior LITHOPROBE

doi:10.1016/S0301-9268(04)00141-X

Insights on Archean continent—ocean assembly, western Superior Province, from new structural, geochemical and geochronological observations: introduction and summary
J.A. Percival and H. Helmstaedt 209
Convergent margin tectonics, central Wabigoon subprovince, Superior Province, Canada
J.A. Percival, V. McNicoll, J.L. Brown and J.B. Whalen 213
Basement terrane correlations and crustal recycling in the western Superior Province: Nd isotopic character of granitoid and felsic volcanic rocks in the Wabigoon subprovince, N. Ontario, Canada
K.Y. Tomlinson, G.M. Stott, J.A. Percival and D. Stone 245
Tectonic and metallogenic importance of an Archean composite high- and low-Al tonalite suite, Western Superior Province, Canada
J.B. Whalen, V.J. McNicoll, A.G. Galley and F.J. Longstaffe 275
Geochemical and isotopic (Nd–O) evidence bearing on the origin of late- to post-orogenic high-K granitoid rocks in the Western Superior Province: implications for late Archean tectonomagmatic processes
J.B. Whalen, J.A. Percival, V.J. McNicoll and F.J. Longstaffe 303

P–T history of garnet-websterites in the Sharyzhalgai complex, southwestern margin of Siberian craton: evidence for Paleoproterozoic high-pressure metamorphism
T. Ota, D.P. Gladkochub, E.V. Sklyarov, A.M. Mazukabzov and T. Watanabe 327
Evidence for the emplacement of ca. 3.0 Ga mantle-derived mafic-ultramafic bodies in the Ukrainian Shield
S.S. Gornostayev, R.J. Walker, E.J. Hanski and S.E. Popovchenko 349
Palaeoproterozoic U–Pb ages of autochthonous and allochthonous granites from the northern Swedish Caledonides—regional and palaeogeographic implications
E.F. Rehnström and F. Corfu 363
Geochemistry of late Archaean stromatolites from Zimbabwe: evidence for microbial life in restricted epicontinental seas
B.S. Kamber, R. Bolhar and G.E. Webb 379

Discussions

Comment on "Neoproterozoic granitoids in South China: crustal melting above a mantle plume at ca. 825Ma?" by Xian-Hua Li et al. [Precambrian Res. 122 (2003) 45–83]
X. Wang, J. Zhou, J. Qiu and J. Gao 401
Reply to the comment: Mantle plume-, but not arc-related Neoproterozoic magmatism in South China
X.-h. Li, Z.-x. Li, W. Ge, H. Zhou, W. Li, Y. Liu and M.T.D. Wingate 405
